- Limit alcohol and cigarette
- Exercise Regularly
- Adequate Sleep
- Reduce exposure to chemical

MALE FERTILITY AND AGE

Is there an age limit on male fertility?

When we hear the term "biological clock," most of us tend to connect that term to women. After all, if the world's oldest dad was able to father a baby at 96 years old, there surely shouldn't be an age limit on male fertility, right? Not exactly. Men also experience the effects of aging with a decrease in fertility over time. To some extent, men face a biological clock.

Researchers found that semen quantity peaked between the ages of 30 and 35.

Testosterone & Fertility

Studies have shown that having low testosterone directly correlates to having a lower sperm count and experiencing male fertility issues

SPOO; DIGITAL MALE FERTILITY CLINIC

We know there's no 'one size fits all' approach when it comes to fertility. Improve your chances of conceiving by understanding your fertility health and getting advice from our fertility experts

We provide a full range of fertility services

SPOO; HOME SPERM TEST KIT

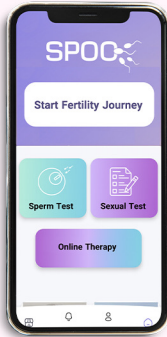

Infertility is a problem that affects couples worldwide, and the cause is male-related up to half of the time.

Semen analysis is the standard first-line response to assess this possibility, but it requires expensive laboratory equipment as well as skilled technicians. It also requires men to produce their sample in a sterile laboratory setting, a task that makes a quarter or more of all men uncomfortable. Their hesitation to participate can delay accurate diagnosis of infertility issues and can lead to their partners undergoing more diagnostic testing and treatments than are actually needed.

SPOO: HOME SPERM TEST KIT

No man likes to go have his semen tested in a lab and even if more thorough assessment is sometimes needed, you can take the first step by testing your sperm at home. SPOO is a device, enabling men to test, analyze, and improve their sperm quality from the comfort of their own home.

Are you actively working to improve your sperm health?

SPOO Home Sperm Test kit is here to help you monitor your progress from the privacy of your own home.

Each kit arrives with at least three tests, meaning users can track and improve their results over a number of testing cycles.

WHY IS SPOO DIFFERENT?

Private and discreet

Repeat Test 3 Times

Test result in 5 minutes

97% Accuracy

Recommended
