

## **General Psychology Graduate Program**

The Master's in General Psychology offers students the opportunity to gain a deeper understanding of the theoretical foundations and research methods of psychology. This program focuses on analyzing human behavior, cognitive, emotional, and social processes, and familiarizes students with research principles, psychological assessment, and intervention techniques. During this program, individuals acquire skills in various fields of psychology such as developmental psychology, social psychology, psychopathology, and experimental psychology, among others. This degree provides a solid professional and academic path for those aiming to work in the educational, research, therapeutic, and counseling fields.
